Board Member Letters

From the President's Desk
By Harvey Elmes

If you were not at the last meeting, you missed a great presentation by Hobby People. Mike Greenshields brought an electric Micro Flyer and demonstrated it in the hall. The plane weighs about an ounce and can really go. Sam Gengo was so impressed that he took \$40 out of his wallet to buy it on the spot. Unfortunately, they are not available yet as they are stuck in customs somewhere. Hobby People donated an SE-5A Biplane 46 ARF for the raffle as well as pilot packs for everyone at the meeting. As always, we appreciate their support.

The Giant Scales have planned a bus trip to the March Air Force Base Museum for November 13th. They have 16 open slots and have offered them to us. They are subsidizing part of the cost so it would only be \$15 for the bus, \$3 admission and whatever you spend for lunch. You can bring a friend or member of the family if you wish. The bus will leave at 7:30 AM from the Park and Ride parking lot on the Southeast corner of Victory and Balboa Blvd. It sounds like a good deal and a good trip. If we should have a huge interest in this trip we could rent a second bus. Sign up at the meeting. Or mail you check for fifteen dollars to Joe Guzzardi Treasurer of the Giant Scale club at 7260 Lubao Ave Northridge 91324. Money is non refundable.

We have a Fun Fly on September 26th. It is open to all AMA members as well as Valley Flyers. Five dollars gets you in, ten dollars gets you in and gives you a pizza feast lunch. I hope to see a sea of Valley Flyers blue out there.

This meeting we will have a demonstration on foam cutting. We also will have the floor open for nominations or volunteers to fill the Board positions that are open for next year. The open positions are: President, Secretary, Director of Helicopters, Director of Jets, Flight Training, Event Hospitality (Snack Bar), Public Relations and Web Master.

As you can see, there are many openings and many ways to get involved in the Club. It takes people willing to give their time to keep this club running. Give it some serious consideration.

The Recs and Parks still don't have the signs, wheel chair ramp or the electric fly area for the field. I've gotten no response from my phone calls so I can't report why the delay or when they will be completed.

October 24th we have the annual Club BBQ. So keep the date open.

I hope you have gotten in some flying this last month and if not flying, then building something to fly.

See you at the fly and the meeting.
Harv.

Membership Report
MEMBERSHIP POTPOURRI
By Bob Smith, Membership Director

NEW MEMBERS!
We welcome the following new members: Michael Lipsey and Christian Stoehr of El Segundo and Woodland Hills respectively. Welcome aboard! Hopefully by now you both have been introduced to our training coordinator and are well on your way in that program.

Our membership count through August is at 149.

(See *Membership Potpourri* – Continued on Page 2.)

(Membership Potpourri Continued from page 1)

GIVE IT AWAY!

This month's give away will feature the Great Planes U-Can-Do-3D .60 size ARF. I want to thank the membership for their support in this year's monthly give away (even though I won the 1st drawing in the August give away). We have been earning from \$50-\$70 over the budget, which is \$150.00. In most years past, we typically would break even each month.

ROSTER/WHO'S WHO

Included in this month's newsletter is the name and AMA number of all active members for 2004 (aka the roster). Some members still have a 'pending' status in lieu of their AMA number. If you are in that category and have received your AMA number, please notify/provide it to me at either my email address (bob@valleyflyers.com) or phone me at (661) 298-2614.

Of course, if your name is not listed and you believe it should be, notify me also of this situation so that I can rectify it.

SURVEY SAYS...

And last but not least, I've included a little survey on what the membership would like to do in the way of events for 2005. Please review it and return it to me by mail or directly at the September meeting. We need them returned before the 1st Tuesday in October, which is when the board will start planning for the 2005 event season.

EVENTS 2005/CONTEST DIRECTORS

This normally comes under the direction of the Event Director, but I thought I'd get a jump on the subject matter.

If you are currently a CD and plan on conducting events in 2005 we need your feedback even more so! If you are a CD and don't plan on conducting events, please let us know ASAP. Let your board know what your plans and ambitions are for 2005! Use the survey, email, phone call or presence at the board meeting as a guest to communicate on this subject.

So that's it from my perspective for this month.
See you Tuesday, September 28th for the General Meeting!

Bob Smith
Membership Director

Safety Views

By George Finch, Safety Officer

The following is a letter sent to IMAA Board members and forwarded by Jay Loury to me:

Dear Members of the IMAA Board,

I have been notified of a horrific accident that happened over the weekend in Wakeman, Ohio. A good friend of mine Casey Rowe and Brian Striker who have flown together for years encountered what we have all talked about at our Board meetings for months, What if one of these 42% aircraft hit someone? Well Brian had a 42% Oracle Bi-plane as it took off he lost control of the aircraft. Casey who was over 300ft away sitting under his tent, stood up and looked at what was transpiring and before he knew it, tried to leap away from the incoming 47# 80 mph 42% biplane but to no avail. He was struck in the back the carbon fiber prop cut through his back into his kidneys, severed his leg almost completely off. They called 911 and he was transported by life flight to Cleveland metro where he is in stable condition.

I talked to Casey today and he wants everyone to know that his can happen to anyone. These guys are professional RC pilots and use the best equipment!! Casey is lucky to be alive and is very shaken by the whole incident. I wished him our best on behalf of the IMAA. I would like to work

with the AMA safety committee and really look into a way to police ourselves. We and Casey are lucky no one was killed. If we do not put restrictions and more failsafe measures in effect on ourselves then I feel the FAA and other government agencies will do it for us. I feel this was our wakeup call I hope we can all work together on these issues.

*Sincerely,
IMAA President
Tom Hayden # 5138*

Maybe it is time to revisit a chainlink barrier fence about 20 ft tall across the front of the pits with 6.5 foot tall openings at the taxiways.

With the popularity of small electric helicopters, more and more Tims have been invited to fly down in the south area instead of out in front of the pits. If you see one between you and the flight line, mention the correct flight area is south even though the electric heli weighs less than a pound. The areas for flight were chosen on the characteristics of the models and electric helicopters, and racing electrics for that matter, are not compatible with the north flight area. Helicopters are south, no matter what weight and racing electrics are to be flown east of the runway.

Papa and Mommy Tims still don't read the signs nor get the idea that an errant .40 size trainer can do to a youngster what the 42% biplane did to the above adult. When you see a youngster headed for the flight line, give a shout and try to convince parents that not only do we have the health and safety of their kids in mind, we don't want fellow flyers to face criminal charges for child endangerment or negligent manslaughter. The same is true for tiny kids toddling amongst the spinning propellers in the pits.

After gathering up what was left in a garbage bag, Tim was heard to say, "you know I got hit a couple of times last week but I thought the radio was OK." Guys, with modern radios, if you get "hit" and no one has turned on, something is wrong with the radio. Wrap it in a foam cocoon and send it in for a checkout. Yes, with shipping it may cost up to \$50 round trip including the repairs, but figure how much the plane, and your time building it is worth, and that the radio may go from the "repairable" bin to the "no such luck" bin. I saw an interesting example just how tolerant modern radios are. Tim was flying up a storm from the third pilot pad, and pilot #2 taxi's to within 15 feet of Tim. At that point, pilot #2's electric goes nuts and taxis off into the grass. Pilot #2 can't understand what is the matter, so he retrieves the electric and puts it on the taxiway a couple of feet closer to Tim, where it proceeds to go nuts again. At this point Tim is getting hit a little and begins to worry. Pilot #2 moves closer to Tim to retrieve his plane again, and Tim's plane gets terminally hit, diving into the big bush out by Woodley. Tim shouts, "Is anyone on Channel XX" and Pilot #2 answers, "Yes, I am" and starts to think of an excuse. At that point Tim says, "Oh ****, I forgot to put up a flag". It was only when Pilot #2's transmitter got within 10 feet of Tim, that Tim got a solid hit, but don't count on that luck, and put up a flag.

We are continuing to have orphan frequency flags being left up at the field. Do you think a big sign on the back of the fence at the road gate saying, "Did you take down your flag?" would help? I saw a Tim with a picture flag leave it up, I guess while he was indulging himself in the Hobby People sale. Poor Sole wanted to fly on the frequency and Tim was no where to be seen. Down came Tim's flag, but Poor Sole decided, even after consulting a scanner to make sure no one was on the frequency, that his plane was too valuable to risk. Later in the day, Tim comes back and asks no questions why his flag is laying sidewise on the frequency stand.

SAFETY, EVERYONE'S RESPONSIBILITY

What's Happening In September and October?!

By Dave Hendrex, Event Director

1. Sunday, September 26th will be the Valley Flyers Fun Fly and Pizza Feed. The landing fee will be \$5, or with the Pizza Feed, \$10. With the recent "cooling trend" this should be an enjoyable day in the fresh air and sunshine. Have you noticed that the temperature is usually 5 to 10 degrees cooler at the field than a mile and a half away at the [Van Nuys] airport?

2. October first through third will be a Float Fly at Lake Casitas sponsored by the Ventura County Comets. Friday is usually reserved for Comets club members, but Saturday and Sunday are open to all pilots. If you have never flown off of water, you should give it a try. The fun isn't just in the flying, but in shooting long low passes across the water and doing touch and go's. You don't have to worry about cross wind takeoffs unless the wind switches to an offshore flow, and even then you have the option of taking off downwind.

Have you ever wondered why the world speed record was held by Schneider Cup float planes for so many years? They didn't have to strike a compromise between wing area and climb rate to accommodate a limited runway length. You too, could get a short winged, heavy aircraft with a fixed pitch prop into the air if you could use half the width of the English Channel for your takeoff run.

3. October tenth will be a "Quiet Time" at the basin as the Black Sheep Exhibition Squadron will be hosting an ALL ELECTRIC Fun Fly. This is a "must see" event if you have any interest in, or curiosity about, electric flight.

4. October 24th is the annual Valley Flyers Fun Fly and Barbecue. CD'd by Bob Smith, this is always a treat for the pilots and their guests. This day is for Valley Flyers ONLY. So bring an airplane, your appetite, and a side dish. The club will furnish the meat and other "hot" delights.

5. On the horizon is a trip to the March AFB Museum in Riverside on November 13th. The Giant Scale Squadron has reserved a 40 passenger bus for the trip and there are a few remaining seats. The cost for the day will be \$15 for the bus, \$3 admission to the museum, and food will be available at several locations on the grounds. The bus will depart the Park and Ride lot at Victory and Balboa at 08:30 and return at approximately 16:00.

We'll see you at the meeting on Tuesday, September 28th. Until then, keep your wings level and the ball centered.

Dave H.

Guests/New Members

Barry is developing an interest, Gonzalo is joining the club and Allan Larsen came down from Fresno.

Old Business

A motion was recognized and seconded to accept the prior board and general meeting minutes.

The signs will be in place in the next two weeks. Also, the shade structure will be moved in for the electric and helicopter areas in the next two weeks.

Club hats and T-shirts are on sale; see Ron Brawdres.

Dave Hendrex will be the CD for the upcoming Fun Fly September 26.

Bob Smith talked about the upcoming BBQ October 24th.

We are now ready to open the floor to accept nominations for all Board Positions. There were no nominations from the floor.

New Business

Mike from Hobby People showed us all the latest. A special thanks to Hobby People for the show and tell and the give away bags.

Some of the items that Mike showed and demonstrated were:

Ascender flying wing:

Valley Flyers Meetings Minutes

August Club Meeting Minutes

August 24th, 2004 by Ken Wright

The meeting was called to order by President Harvey Elmes at 7:30 p.m. who also led in the flag salute.

Micro Flyer (Clancy-Inspired Styling) with TX and RX for \$40:

AT6 and Cessna 182 in the back:

Decathlon for \$69:

Corsair with retracts:

Delta:

August Show and Tell

The Valley Flyers would like to thank the members who brought in "Show And Tell" for the August Club meeting. Do you have a project in the works or completed that you could share at the September meeting?

Jerry's Sig Four Star 40 with an OS 48 four stroke:

Willie is ready for the next marathon event:

Dave's Mad Dog has a cowl with aerodynamic features:

Dave used modeling clay to build up features on the cowl and wheel pants. Taxing crosswind with this plane is tough, so he uses a small bag of shot on the stab during taxi.

Bill's Raptor is equipped for night flying:

Ken's Note: [I saw this fly Friday night and it was awesome].

Matt's radio is in development:

It is a very complex setup.

Raffle:

Meeting adjourned at 9:30 p.m.

Board Meeting Minutes of August 31, 2004

By Ken Wright, Secretary

Meeting called to order at 7:00 p.m. by Harvey Elmes.

In Attendance: Harvey Elmes, Ken Wright, Dave Hendrex, George Finch, Ron Brawders, Bob Smith, Sam Gengo, Bill Bolin, Rob Janiger Mike Trudell; **Absent:** Patrick Ashour, Steve Garrison, Ed Gappell and Video Vic

Harvey Elmes – There has been no response from the Recs and Parks on the sign and racing cages issues. Will advise the general membership that there are extra seats on the Giant Scale trip to the March AFB. Steve Garrison will stay on as treasurer. The speaker for the next meeting will be Tony Di Leo who will demonstrate cutting foam.

Bob Smith – Commented on the raffle and that we are doing better than break-even.

Ron Brawders – We have hats, T-shirts, and polo shirts for sale for all interested club members.

Dave Hendrex – We will have pizza at the September Fun Fly.

Mike Trudell – The helicopter event netted \$1,530.

Sam Gengo – Talked about coming up with the 2005 event schedule. Talked about having the BBQ rain or shine. Articles due September 11.

George Finch – We have a problem with the electric helicopters flying in the pits. We will direct them to fly in the helicopter area.

Rob Janiger – The number of people flying jets appears to have stabilized.

Meeting was adjourned at 8:30 PM

Classifieds

Contest Directors Needed

If you have been a member of the AMA for at least three years, you to can be a **Contest Director**. Advantages: You can get a four or less digit AMA number. You can get a portion of your AMA dues free.

E-mail George Finch for further instructions.

Wanted new Valley Flyers Instructors – Especially Weekdays!

Give something back to the hobby by volunteering to be a Valley Flyers flight instructor. Benefits include practice in recovery from unusual attitudes, a sore finger from the trainer button, and a healthy suntan. New instructors will be taught how to instruct by an ex-professional FAA certified flight instructor. See George Finch.

To run an ad in the Valley Flyer Classifieds please submit your ad via e-mail to sam@valleyflyers.com. Ads must be submitted before the first Tuesday of the month.

Tail Feathers

Trials Of The MDS .68

By Bob Smith

If you may recall, I am testing two MDS .68 engines in a Great Planes RCM Advanced Trainer .60. I am running a 12/7 APC prop with PowerMaster 15% (with an additional 3 ounces of Klotz synthetic oil). Again, the MDS has been dropped from the distribution line at Horizon Hobbies but they are still servicing the engines.

I received the engine back from MDS with a new piston and sleeve along with an updated carburetor. I subsequently shipped them both (there are two for a future twin project, the OV10 Bronco) to Clarence Lee to have the retaining clips/pins replaced with a button type retainer. I have not flight-tested either engine but I have run over 50 ounces of fuel (on the ground) through one of them and it's starting to feel pretty loose already! Transition to power and idle is very good at this point.

Just a side note; before the engines were updated, I stuck a new O.S. .61 in the RCM Trainer and it performed very well. Same fuel and prop combination.

I should have some flight time on the MDS engines by the next newsletter! Until then, turn you ailerons into the cross wind when taxiing!

Bob Smith

October Club Safe Fly And BBQ

Harvey Elmes and I appreciate Bob Wiikari, Fred Roberts and David Tarlau signing up as event officials. We still need more club support in this area to make this a fun and successful event. Help is needed in the areas of transmitter impound and flight line safety coordinators. We also need a team of folks to set up tables for eating, supply the eating and dishing utensils, napkins, paper table cloths and drinks along with ice and BBQ fluid and briquettes.

Harvey and I can be reached at 661-252-0367 & 661-298-2614 respectively. We can also be contacted via email: Harvey: helmes@thevine.net; or Bob: bob@valleyflyers.com.

The plan is to conduct the BBQ as scheduled at 12:30 p.m., regardless of the flying conditions. Last year, the flying portion was, for the most part, blown out. The BBQ will prevail!

We also want to thank the Chefs, Ricc Bieber (chicken), Bob Tarlau, George Finch (steaks) and Danny Coe for Tuna Fish. Ricc Bieber has volunteered to procure chicken and steaks if no one else volunteered (Ricc they didn't). Please let us know if your able to bring some extra folding chairs and tables.

So... please help your club to make this a fun event and lend a helping hand! Thanks again to Fred, George, Robert W., Danny, David and Bob for signing up so far.

Remember, your names, along with others that help support the event will be added to the year-end officials list for the final give away!

Regards, Harvey Elmes and Bob Smith

Learning to Fly a Helicopter

By Jay Lowrey "Soon to be Chopper Pilot"

Not being your safety officer any more, I thought I might give some insight to the non-chopper pilots in the club. You will never know what you are missing until you have one and learn to fly it. I have tried and can fly almost any type of winged prop-type model A/C. I'm not the best pilot at the field by any means but I can fly and enjoy it very much. But this Helicopter is a breed all to itself.

A few things I would like to bring to your attention about this little beast you may not know. It requires a computer radio. With things like throttle curves, pitch curves, and a few more things I know nothing about, but not to worry about that. There is always someone around that understands and will set your TX for you. Not always correctly but they will change everything on your TX and leave you to figure out what should be done next. I feel sometimes it might help if you could cry.

Then there are the flying characteristics of this bird. It does not have any. I refer to it as a bird, but a bird can fly, my chopper cannot. It can fall in two or even three directions at the same time. But once it starts to fall there is nothing you can do to stop it. Its like it has a mind of its own and it says, "He's getting cocky. Time to show whose boss here."

Do you remember the first time you had to fly an airplane coming at you?? You learned how to push the low wing up and that is about all there was to it. Of course you thought every control on the radio had reversed. But with a chopper it can turn half or three quarters and all the controls no longer have any meaning to you. And if this puppy happens to turn its nose toward you, my advice is to throw the transmitter down and run for your life.

There is one other thing I have not mentioned. Once a helicopter starts toward you, there is no control on the TX that will detour its path. It helps if you are fast...and I mean of foot not hand. I have a friend that walked out with me one day. For some reason the Heli went up to about ten feet and turn towards us. I yelled run and we both did. He looked over his shoulder and asked if it was gaining on us. How would I know I was about to run over him as the chopper crashed into the side of the shed.

I noticed when I first started with this thing everyone at my end of the field kind' a moved back. At first I thought they were just being nice but then I figured out they feared for their lives. I had one of the guys tell me I should get a fifty-gallon drum and cut eyeholes near the top. Get inside where I could be safe and learn to fly it. Believe it or not I considered it. Well my crashes are getting farther away from me and you will never know how proud that makes me. That means I'm getting closer to actually flying. I know every time that Jay of the Hobby House sees me take it out he has a slight grin on his face for he knows I will be needing parts before the day ends.

Now I will say one thing: I have become a pretty good helicopter mechanic. I can pretty well repair most anything that falls or is torn off. I'm looking forward to the day I can fly in a helicopter event. Some of the true chopper pilots complain because us new guys don't come out and participate in the events. Well it's like this I'm not into self-abuse I don't feel like paying to embarrass myself. Or even worse, hurting someone especially myself. I figure I'm down to about four crashes per gallon of fuel. Laugh if you must but that is an improvement big time for me.

Anyway I hope you have read this in the same vein that it was written: "In fun." I'm having a ball with the chopper and I'm sure it will get better as I go. Not sure if the money or my wife will hold up until I learn. If this comes out before the Holidays I hope each and everyone of you has a wonderful one!

Remember fly like you wish everyone else would: "SAFELY."
